## Summary

---

Frontend Developer with hands-on experience building scalable and responsive web applications using modern JavaScript frameworks, TypeScript, and REST APIs. Developed production-level projects with authentication systems, performance optimization, lazy loading, and reusable UI components. Passionate about creating clean user experiences and continuously expanding skills in frontend and full-stack development.

## Education

---

### B.Sc. in Information Technology

Faculty of Computers and Information(Damanhour University)

Grade: Good

2020 - 2024

## Internships

---

### Information Technology Institute (ITI)

Frontend & Cross-Platform Mobile App Development Trainee

Mar 2025 - July 2025

- Built responsive web and mobile applications using React, React Native, and Flutter.
- Worked with REST APIs, authentication systems, and reusable UI components.
- Applied Agile/Scrum methodologies in collaborative team projects.
- Improved frontend performance and user experience across multiple applications.

## Courses

---

### Elevate Tech

Frontend Web Development (Angular)

Jul 2026 - Present

### Route Academy

Full-Stack Web Development (Angular & .NET)

Sep 2025 - Present

### Arab Academy for Science, Technology & Maritime Transport (AASTMT)

Gained foundational programming skills and implemented OOP concepts through practical Java-based projects.

Aug 2022- Sep 2022

## Projects

---

### E-Commerce Angular App [\[Github-Repo\]](#)

Developed a scalable e-commerce application using Angular, RxJS for reactive with Standalone Components, lazy loading, and SSR for improved performance and SEO....improving page load time by 35% through SSR and reducing bundle size by 20% using Lazy Loading. Implemented authentication, cart, wishlist, and order management, with responsive UI using Tailwind CSS and enhanced UX via spinners and toast notifications.

### Social Feed Web Angular App [\[Github-Repo\]](#)

Built a scalable social application using Angular with Standalone Components, functional routing, and lazy loading....achieving a 95% performance score on Google Lighthouse and handling real-time data efficiently. Implemented authentication with guards, HTTP interceptors for error/loading handling, and core features like feed, profile, and notifications. Designed responsive UI with Tailwind CSS and improved UX using spinners and toast messages.

## Technical Skills

---

**Languages:** TypeScript, JavaScript (ES6), Dart, C++, Java, Python

**Frameworks/Libraries:** Angular, RxJs, Flutter, React.js (familiar), React Native (familiar), Next.js (familiar),

**Styling:** Tailwind CSS, Bootstrap

**Tools:** Git & GitHub, Postman, REST APIs, SSR, Lazy Loading, PWA, Redux Toolkit,

**Platforms:** Cross-Platform Mobile

## Interpersonal Skills

---

- Technical Documentation
- Problem solving
- Team Player
- Agile/Scrum Awareness
- Team Collaboration
- Communication

## Extracurricular Activities

---

- **Participated in ECPC (Egyptian Collegiate Programming Contest).**
- **Contribute to online coding communities and tech discussions.**

## Languages

---

- Arabic ( Mother Tongue )
- English ( B2)

## Additional Information

---

- **Military Status:** Exempted
